I. INTRODUCTION

A. RISK FACTORS

i. STANDARD RISK FACTORS

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1 lakh made by it towards setting up the Fund.
- The present scheme is the first scheme being launched under its management.
- The present scheme is not a guaranteed or assured return scheme.

ii. SCHEME SPECIFIC RISK FACTORS

a) Risks associated with investing in money market instruments

- Investments in money market instruments would involve a moderate credit risk, i.e. risk of an issuer's inability to meet the principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

b) Risks associated with investing in Bonds

- The NAV of the Scheme, to the extent invested in Debt Securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Debt Securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is sold.
- Debt Securities are subject to the risk of the issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated/unrated Securities offering higher yields.
- The liquidity of investments made in the Scheme may

be restricted by trading volumes and settlement periods. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. There may be temporary periods when the monies of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell Securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for Debt Securities could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of the Securities held in the Scheme's portfolio.

- The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to their target date of divestment.
- Debt Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to Debt Securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted Debt Securities that offer attractive yields within regulatory limits. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investment due to its holdings of the unlisted Securities may be affected if they have to be sold prior to the target date of investment.
- While Debt Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market Securities, while fairly liquid, lacks a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the Security is finally sold.
- Money market Securities and debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). These Securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The AMC will endeavour to manage credit risk through in-house credit analysis. The Scheme may also, but is not obliged to, use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio. There is no guarantee that hedging techniques will achieve the desired result.
- The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income Securities, will be

affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income Securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income Securities can be expected to decline.

- To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by interest rate movement (basis risk) - coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of Securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk:
 - (i) due to the time gap in the resetting of the benchmark rates, and
 - (ii) to the extent the benchmark index fails to capture interest rate changes appropriately (spread risk): though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.
- **Settlement Risk (counterparty Risk):** Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;
- **Liquidity Risk:** The market for floating rate Securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such Securities that the Scheme is invested in.
- **Prepayment Risk:** The borrower/issuer of security may prepay the receivables prior to their respective due dates. This may result in change in the yield and tenor for the Scheme.
- Different types of Securities in which the Scheme may invest as given in the SID carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than government Securities. Further even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

c) Risks associated with Derivatives

- Derivatives products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decisions of a fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- As and when the Scheme trades in derivative products, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that a derivative adds to the portfolio.
- Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:
 - (a) **Credit Risk** - this occurs when a counterparty defaults on a transaction before settlement and, therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price, in order to maintain the validity of the hedge.
 - (b) **Market Liquidity Risk** - this is where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
 - (c) **Model Risk** - this is the risk of mis-pricing or improper valuation of derivatives.
 - (d) **Basis Risk** - this is when the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

d) Risks associated with Short Selling and Securities Lending

The risks in lending portfolio Securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of Securities, i.e. the Scheme, and the approved intermediary. Such failure to comply can result in a possible loss of rights in the collateral put up by the borrower of the Securities, the ability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the Securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such Securities and this can lead to temporary illiquidity.

e) Risk Associated with investing Securitized Debt:

Generally available asset classes for securitization in India are:

- Commercial vehicles
- Auto and two wheeler pools
- Mortgage pools (residential housing loans)
- Personal loans, credit card and other retail loans
- Corporate loans/receivables

In terms of specific risks attached to securitisation, each asset class would have different underlying risks, however, residential mortgages typically have lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is normally easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the

risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA or equivalent rated asset classes. Some of the factors, which are typically analyzed for any pool, are as follows:

Size of the loan: this generally indicates the kind of assets financed with loans. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence in the construction of a housing loan asset pool for say ₹ 1,00,00,000/- it may be easier to construct a pool with just 10 housing loans of ₹ 10,00,000/- each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed ₹ 5,00,000/- per individual.

Average original maturity of the pool: this indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60 month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans having original maturity of 60 months, more than 70% of the contracts have paid more than 50% of the monthly installments and if no default has been observed in such contracts, this pool should have a lower probability of default than a similar car loan pool where 80% of the contracts have not yet paid 5 installments.

Loan to value ratio ("LTV"): this indicates how much of the value of the asset is financed by borrower's own equity. The lower the LTV, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate: for a truck costing ₹ 20 lakhs, if the borrower has himself contributed ₹ 10 lakhs and has taken ₹ 10 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth ₹ 20 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only ₹ 2 lakhs out of his own equity for a truck costing ₹ 20 lakhs. Between the two scenarios given above, as the borrower's own equity is lower in the latter case, it would typically have a higher risk of default than the former.

Average seasoning of the pool: this indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a pool of personal loans, if a pool of assets consist of borrowers who have already repaid 80% of the installments without default, the probability of default is lower than for a pool where only 10% of installments have been repaid.

In the Indian scenario, also, more than 95% of issuances have been AAA or equivalent rated issuances indicating the strength of the underlying assets as well as adequacy of credit enhancement.

Default rate distribution: this indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is that, as against 0-30 DPD, the 60-90 DPD is a higher risk category. Unlike in plain vanilla instruments, in securitisation transactions it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating.

Investment exposure of the Fund with reference to securitised debt:

- The Scheme will predominantly invest only in those

securitisation issuances which have AAA or equivalent rating indicating the highest level of safety from credit risk point of view at the time of making an investment.

- The Scheme may invest in various types of securitization issuances, including but not limited to asset backed securitisation, mortgage backed securitisation, personal loan backed securitisation, collateralised loan obligation/collateralized bond obligation and so on.
- The Scheme does not propose to limit its exposure to only one asset class or to have asset class based sub-limits as it will primarily look towards the AAA or equivalent rating of the offering.
- The Scheme will conduct an independent due diligence on the cash margins, collateralisation, guarantees and other credit enhancements and the portfolio characteristic of the securitisation to ensure that the issuance fits into the overall objective of the investment in high investment grade offerings irrespective of underlying asset class.

f) Risks associated with investments in securitised paper.

Types of securitised debt vary and carry different levels and types of risks. Credit risk on securitised bonds depends upon the originator and varies depending on whether they are issued with recourse to the originator or otherwise. Even within securitised debt, AAA or equivalent rated securitised debt offers lesser risk of default than AA rated securitised debt. A structure with recourse will have a lower credit risk than a structure without recourse.

As underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts, credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of property mortgaged against these borrowings, nature of loan agreement/mortgage deed in case of home loan, adequacy of documentation in case of auto finance and home loans, capacity of borrower to meet its obligation on borrowings in case of credit cards and the intention of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

Changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors, but may have an impact on the reinvestment of the periodic cash flows that the investor receives in the securitised paper.

Limited Liquidity & Price Risk:

Presently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the Fund to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Risks due to possible prepayments: Weighted Tenor/Yield:

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances:

- obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or

- receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that receivable; or
- the servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same.

In the event of prepayments, investors may be exposed to changes in tenor and yield.

Bankruptcy of the originator or seller:

If the originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to the Trust was not a sale then the Fund could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to the Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of receivables to the Trust in trust for and for the benefit of the investors, as envisaged herein, would constitute a true sale.

Bankruptcy of the investor's agent:

If an investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of the investor's agent to the assets/receivables is not in its capacity as agent/Trustee but in his personal capacity, then an investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by an investor's agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of the investor's agent. Legal opinion is normally obtained to the effect that the investors agent's recourse to assets/receivables is restricted in his capacity as agent and trustee and not in its personal capacity.

Credit Rating of the Transaction/Certificate:

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

Risk of Co-mingling:

The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds, due to investors, the investors may be exposed to a potential loss. Due care is normally taken to ensure that the servicer enjoys the highest credit rating on a standalone basis to minimize co-mingling risk.

Restrictions on Redemptions:

As outlined in Section III-B – 'Restrictions on Redemptions' the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a

systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

B. REQUIREMENT OF MINIMUM UNITHOLDERS IN THE SCHEME

The Scheme shall have a minimum of 20 Unitholders and no single Unitholder shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme/plan(s) does not have a minimum of 20 Unitholders in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The two conditions should be complied with in each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any Unitholder over the quarter, a rebalancing period of one month would be allowed and thereafter the Unitholder who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said Unitholder to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic Redemption by the Mutual Fund on the Applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY

- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of an amount of ₹ 1,00,000/- (Rupees One Lakh only) made by it towards setting up the Mutual Fund or such other accretions and additions to the initial corpus set up by the Sponsor. The associates of the Sponsor are not responsible or liable for any loss or shortfall resulting from the operation of the Scheme.
- Neither this SID nor the Units have been filed/registered in any jurisdiction other than India. The distribution of this SID in certain jurisdictions may be restricted or totally prohibited and accordingly, persons who come into possession of this SID are required to inform themselves about, and to comply with, any such restrictions.

The mutual funds or other schemes managed by these affiliates/associates may acquire a substantial portion of the Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such affiliates/associates may have an adverse impact on the value of the Units because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- Mutual funds invest in Securities which may not always be profitable and there can be no guarantee against loss resulting from investing in the Scheme.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open ended liquid scheme

B. INVESTMENT OBJECTIVE OF THE SCHEME

ITI Liquid Fund is an open ended liquid scheme that seeks to provide reasonable returns, commensurate with low risk while providing a high level of liquidity, through a portfolio of money market and debt securities.

However, there can be no assurance that the investment objective of the Scheme will be realised.

C. HOW WILL SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, it is anticipated that the asset allocation shall be as follows:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Money market instruments (including cash and reverse repo and debt instruments with maturity up to 91 days)*	100%	0%	Low to Medium
Securitised debt instruments with Residual maturity up to 91 days	30%	0%	Low to Medium

*Investment in Derivatives - Up to 10% of the net asset of the Scheme

Floating rate debt instruments are debt instruments issued by Central/state governments, corporates, PSUs, etc. with interest rates that are reset periodically. The periodicity of interest reset could be daily, monthly, quarterly, half yearly, and annually or any other periodicity that may be mutually agreed between the issuer and the Fund.

Money market instruments include commercial papers, commercial bills, treasury bills, Tri-party Repo, government securities having an unexpired maturity up to one year, call or notice money, certificates of deposit, issuance bills and any other like instruments as specified by the RBI from time to time.

The cumulative gross exposure through debt and derivative positions should not exceed 100% of the net assets of the Scheme. The Scheme may undertake repo/reverse repo transactions in Corporate Debt Securities.

Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.

D. WHERE WILL THE SCHEME INVEST

In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days.

In case the maturity of the security falls on a non-business day then settlement of securities will take place on the next business day.

Inter-scheme transfers of securities having maturity of upto 91 days only shall be permitted in the Liquid scheme.

The portfolio duration will undergo a change according to the expected movement in interest rates. Liquidity conditions and other macroeconomic factors affecting interest rates shall be taken into account for varying the portfolio duration. Under normal circumstances, if the interest rates move down, the duration of the portfolio shall be increased and vice versa.

It is expected that the modified duration for the Fund will be in a range of 1-3 months depending on the interest rate view. However, this can undergo a change in case the market conditions warrant it and according to the Investment Manager's view.

The Investment Manager may review the above pattern of investments based on views on interest rates and asset liability management needs.

Change in Investment Pattern Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and defensive considerations.

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Scheme will rebalance the portfolio within 30 days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of 30 days, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

Subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI Regulations, as detailed later in this document.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The objective will be to allocate the assets of the Scheme between various money market and fixed income Securities with the objective of providing liquidity and achieving optimal returns.

The actual percentage of investment in various money markets and other fixed income Securities will be decided after considering the economic environment including interest rates and inflation, the performance of the corporate sector and general liquidity and other considerations in the economy and markets.

The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments proposed to be invested in. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term/long term financial health of the issuer.

Position of Bond Markets in India

The Indian Bond Market today is one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates

and improved settlement systems. It can be broadly divided into:

- The government securities market or the G-Sec market consisting of debt securities issued by the central government and state government. One of the ways in which the government raises resources to finance its Gross Fiscal Deficit is through Market Borrowings. The Market Borrowing amount is decided upon at the commencement of the fiscal year. The GOI decides the overall size of the Market Borrowing Programme in consultation with Reserve Bank of India. Within this overall size, the borrowing needs of the central government and state government are accommodated. Government Securities can be issued in the form of dated securities of both the central and state governments (known as State Development Loans) and Treasury Bills (used to finance the short term financing requirements of the government), through an auction process.
- The corporate bond/non-government securities market in India comprises bonds & debentures normally issued by various corporations such as Public/Private Sector Enterprises, Public/Private Sector Banks, All India Financial Institutions, Municipal Bodies, State level undertakings etc for their normal business activities. Corporate bonds are priced at a spread over the corresponding government security depending on the level of perceived risk. This is because these bonds are not sovereign and are serviced by the entity issuing them and carry a risk of default on the part of the entity in fulfilling its interest or principal payment obligations. These securities can be fixed or floating rate instruments/deep discount bonds/PTCs or short term money market instruments (with a maturity of upto 1 year) such as certificates of deposit, commercial papers etc.

Institutional participants such as banks, primary dealers, mutual funds, insurance companies, retirement funds, corporate etc. are the major players in the bond market.

The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The price and yield on various debt instruments fluctuates from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, exchange rates, maturity profile, credit risk etc.

Following table exhibits various debt instruments along with indicative yields as on November 30, 2018:

Instrument	Yield Range (% per annum)
Tri-party Repo	6.29%-6.40%
1 Month T Bill	6.50% - 6.65%
3 Month T Bill	6.77%-6.85%
6 Month T Bill	7.06%-7.15%
1 Year T Bill	7.22%-7.30%
1 month CP	6.65%-6.80%
3 month CP	7.24%-7.45%
6 month CP	7.36%-7.55%
1 year CP	8.48%-8.70%

Source: Bloomberg/Reuters

These yields are only indicative and interest rates are susceptible to fluctuations and are sensitive to various macro economic and political factors. Please note that the above examples are based on assumptions and are used only for illustrative purposes.

Portfolio Turnover

The Scheme being an open ended liquid scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. Therefore, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The Scheme has no specific target relating to portfolio turnover. Higher portfolio turnover rate may result into higher brokerage and transaction cost.

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

CRISIL Liquid Fund Index

The Scheme intends to have a portfolio mix of instruments, which are mainly captured by the Benchmark Index. Hence, the benchmark is an appropriate benchmark for the Scheme. The performance will be benchmarked to the Total Returns Variant of the Index.

A benchmark of a fund reflects the funds risk/return profile and is a measure for performance evaluation. The Scheme intends to invest in a portfolio of securities and the risk/return profile which is best captured by the following selected benchmark.

CRISIL Liquid Fund Index developed by CRISIL, fulfills the above criteria's and hence is considered best suited as a benchmark for the Scheme for performance evaluation.

The constituents and weights of CRISIL Liquid Fund Index are as under:

Constituents	Sub-indices Weights (2018-19)
CRISIL CBLO Index	15.00%
CRISIL 2 Month CP Index	54.00%
CRISIL 2 Month CD Index	10.00%
CRISIL 3 Month CP Index	16.00%

Guidelines Governing Investment in Debt Securities

The AMC will follow a policy where, before any investment is made in any debt instrument, a research report will be prepared by the Chief Investment Officer/Fund Manager/Research analyst which will analyze the debt instruments. The research report shall be

reviewed at least on a half yearly basis. The recommendations of the research report shall not be binding on the Fund Manager/Chief Investment Officer.

Any purchase which is made against the recommendations of the research recommendation shall be backed by the reasons for the same by the concerned Fund Manager/Chief Investment Officer. For investment into companies for which there is a pre existing research report that is not dated more than six months from the day of the proposed investment, the investment can be made by the Fund Manager directly. However, if the research report is dated more than six months without any subsequent update then a fresh report will required.

The investment philosophy of the AMC shall be directed towards providing stable returns with a low risk strategy and capital appreciation/accretion through investment in debt instruments and related securities besides preservation of capital. The Scheme shall invest only in debt securities with credit rating of AA- and above.

Investment in Gov Securities

As per the Regulations and investment restriction guidelines issued by SEBI, the AMC will follow a policy wherein each decision of purchase/sale of government Securities and money market instruments shall be recorded. A weekly report relating to the portfolio of the Scheme will be reviewed by the Investment Committee of the AMC.

Investment and security selection of all kind of debt instruments including Gov Securities, State Government Securities, and Government guaranteed debt is delegated to the fund manager with the responsibility on the fund manager to ensure conformity with the specified minimum credit rating standards for position credit risk and portfolio credit risk. All investments in Gov Securities shall be done in accordance with SEBI/RBI guidelines.

Investment restrictions pertaining to Derivatives

Derivatives products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and the decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD. BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by the RBI permitting participation by mutual funds in interest rate swaps and forward rate agreements, the Fund will use derivative instruments for the purpose of hedging and portfolio balancing. Further, the guidelines issued by the RBI from time to time for forward rate agreements and interest rate swaps and other derivative products will be adhered to by the Fund.

Interest Rate Swaps (IRS)

An IRS is an agreement between two parties to exchange stated interest obligations for an agreed period in respect of a notional principal amount. The most common form is a fixed to floating rate swap where one party receives a fixed (pre-determined) rate of interest while the other receives a floating (variable) rate of interest.

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example of a derivatives transaction -

Basic Structure of a Swap

Bank A has a six-month V 10 crore liability, currently being deployed in call. Bank B has a V 10 crore, six-month asset, being funded through call. Both banks are running an interest rate risk. To hedge this interest rate risk, they can enter into a six-month MIBOR swap. Through this swap, A will receive a fixed pre-agreed rate (say 7%) and pay "call" on the NSE MIBOR ("benchmark rate"). Bank A paying at "call" on the benchmark rate will hedge the interest rate risk of lending in call. Bank B will pay 7% and receive interest at the benchmark rate. Bank A receiving of "call" on the benchmark rate will hedge its interest rate risk arising from its call borrowing.

The mechanism is as follows:

- Assume the swap is for ₹ 10 crore March 1, 2005 to September 1, 2005. A is a fixed rate receiver at 7% and B is a floating rate receiver at the overnight compounded rate.
- On March 1, 2005, A and B will exchange only an agreement of having entered this swap. This documentation would be based on an International Swaps and Derivatives Association (ISDA) template.
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On September 1, 2005 they will calculate the following:
- A is entitled to receive interest on ₹ 10 crore at 7% for 184 days i.e. ₹ 35.28 lakh, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
- B is entitled to receive daily compounded call rate for 184 days and pay 7% fixed.
- On September 1, 2005, if the total interest on the daily overnight compounded benchmark rate is higher than ₹ 35.28 lakhs, A will pay B the difference. If the daily compounded benchmark rate is lower, then B will pay A the difference.
- Effectively, Bank A earns interest at the rate of 7% p.a. for six months without lending money for six months fixed, while Bank B pays interest @ 7% p.a. for six months on ₹ 10 crore, without borrowing for six months fixed.

As per the above mentioned RBI circulars, mutual funds are permitted to do interest rate swaps/forward rate agreements for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs also have inherent credit and settlement risks. However, these risks are reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in derivatives will be in accordance with the SEBI Regulations/guidelines and presently derivatives shall be used for hedging and/or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, using the IRS route, it is possible to generate better returns/meet the objective of the Scheme at a lower cost. For example, if buying a two-year MIBOR based instrument and receiving the two-year swap rate yields better return than buying the two-year AAA corporate instrument, the Scheme would endeavour to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that they are likely to rise in the future.

These investment limitations/parameters as expressed (linked to the net asset/net asset value/capital) shall, in the ordinary course, apply as at the date of the most recent transaction or commitment to invest and changes do not have to be effected merely because, owing to appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Trustee/AMC, any such limits would thereby be breached.

Apart from the investment restrictions prescribed under the Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

The Trustee/AMC may alter these above stated limitations from time to time (as also the provisions of the Trust Deed) and also to the extent the Regulations change so as to permit the Scheme to make its investments in the full spectrum of permitted investments in order to achieve its investment objective.

The Units under the Scheme may be offered as security by way of a pledge/charge in favour of scheduled banks, financial institutions, non-banking finance companies ("NBFC's), or any other body. The AMC/RTA will note and record such Pledged Units. A standard form for this purpose is available on request at all ISCs. The AMC shall mark a lien on the specified units only upon receiving the duly completed form and documents as it may require. Disbursement of such loans will be at the entire discretion of the bank/financial institution/NBFC or any other body concerned and the Mutual Fund assumes no responsibility thereof.

The Pledgor will not be able to redeem/switch Units that are pledged until the entity to which the Units are pledged provides a written authorisation to the Mutual Fund that the pledge/lien/charge may be removed. As long as Units are pledged, the Pledgee will have complete authority to redeem such Units. Dividends declared on Units under lien will be paid/re-invested to the credit of the Unit Holder and not the lien holder unless specified otherwise in the lien letter.

For units of the Scheme held in electronic (Demat) form, the rules of Depository applicable for pledge will be applicable for Pledge/Assignment of units of the Scheme. The AMC reserves the right to change the operational guidelines for temporary lien on Units from time to time.

Right to Limit Redemptions:-

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme when there are circumstances, which the AMC/Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets such as:

1. Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security.
2. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
3. Operational issues - when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.

Such restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period. However, if exceptional circumstances/systemic crisis referred above continues beyond the expected timelines, the restriction may be extended further subject to the prior approval of Board of Directors of the AMC and Trustee Company giving details of circumstances and justification for seeking such extension shall also be informed to SEBI in advance.

Procedure to be followed while imposing restriction on redemptions

- a. No redemption requests upto INR 2 lacs per request shall be subject to such restriction;
- b. Where redemption requests are above INR 2 lacs:
 - i. The AMC shall redeem the first INR 2 lacs of each redemption request, without such restriction;
 - ii. Remaining part over and above INR 2 lacs shall be subject to such restriction and be dealt as under:
 - Any Units which are not redeemed on a particular Business Day will be carried forward for Redemption to the next Business Day, in order of receipt.
 - Redemptions so carried forward will be priced on the basis of the Applicable NAV (subject to the prevailing Load, if any) of the subsequent Business Day(s) on which redemptions are being processed.
 - Under such circumstances, to the extent multiple redemption requests are received at the same time on a single Business Day, redemptions will be made on a prorata basis based on the size of each redemption request, the balance amount being carried forward for redemption to the next Business Day.

Cash Investments in mutual funds

In order to help enhance the reach of mutual fund products amongst small investors, who may not be tax payers and may not have PAN/bank accounts, such as farmers, small traders/businessmen/workers, SEBI has permitted receipt of cash transactions for fresh purchases/additional purchases to the extent of ₹.50,000/- per investor, per financial year shall be allowed subject to:

- i. compliance with Prevention of Money Laundering Act, 2002 and Rules framed there under; the SEBI Circular(s) on Anti Money Laundering (AML) and other applicable Anti Money Laundering Rules, Regulations and Guidelines; and

- a. The amount of actual commission paid by the AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each MF Scheme. The term 'commission' here refers to all direct monetary payments and other payments made in the form of gifts/rewards, trips, event sponsorships etc. by the AMC/MFs to the distributors. Further, the commission disclosed in CAS shall be gross commission and shall not exclude costs incurred by distributors such as Goods and Services Tax (GST) (wherever applicable, as per existing rates), operating expenses, etc.
- b. The scheme's average total expense ratio (in percentage terms) for the half-year period for the scheme's applicable plan (regular or direct or both) where the concerned investor has actually invested in.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period.

- The AMC shall identify common investors across fund houses by their permanent account number (PAN) for the purposes of sending CAS.
- In the event the account has more than one registered holder, the first named Unitholder shall receive the CAS.
- The transactions viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan and systematic transfer plan, carried out by the Unit holders shall be reflected in the CAS on the basis of PAN.
- The CAS shall not be received by the Unit holders for the folio(s) not updated with PAN details. The Unit holders are therefore requested to ensure that the folio(s) are updated with their PAN.

- Based on the PANs provided by the asset management companies/mutual funds' registrar and transfer agents (AMCs/MF-RTAs), the Depositories shall match their PAN database to determine the common PANs and allocate the PANs among themselves for the purpose of sending CAS. For PANs which are common between depositories and AMCs, the Depositories shall send the CAS. In other cases (i.e. PANs with no demat account and only MF units holding), the AMCs/MF-RTAs shall continue to send the CAS to their unit holders as is being done presently in compliance with the Regulation 36(4) of the SEBI (Mutual Funds) Regulations.
- Where statements are presently being dispatched by email either by the Mutual Funds or by the Depositories, CAS shall be sent through email. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered in the Depository system.
