## I. INTRODUCTION

### A. RISK FACTORS

#### i. Standard Risk Factors:

- 1) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- 2) As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down, depending on the various factors and forces affecting the capital markets.
- 3) Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- 4) The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- 5) The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of an amount of Rs. 1 lakh made by it towards setting up the Fund.
- 6) **ITI Long Term Equity Fund** is not a guaranteed or assured return Scheme.
- 7) Although it is intended to generate capital appreciation and maximize the returns by actively investing in debt and money market instruments, investors may note that AMC/Fund Manager's investment decisions may not be always profitable.

#### ii. Scheme Specific Risk Factors:

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

By virtue of requirements under the ELSS Guidelines, Units issued under the Scheme will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realise returns on investments in the Scheme is consequently restricted for the first three years. Redemption will be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

#### a) Risks associated with investing in Equities and Equity related Securities:

- The value of the Scheme's investments may be affected by factors affecting the securities markets such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may be affected.
- Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Scheme may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section I - 'Restrictions on Redemptions'].
- Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Scheme's portfolio

could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Scheme's portfolio.

- Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.
- The liquidity and valuation of the Scheme's investments due to its holdings of Securities proposed to be listed may be affected if they have to be sold prior to the target date for disinvestment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with Securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in Securities proposed to be listed within the regulatory limit. This may however increase the risk of the portfolio.

**b) Risks associated with investing in Money Market instruments:**

- Investments in money market instruments would involve a moderate credit risk, i.e. risk of an issuer's inability to meet the principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline

**c) Risks associated with investing in Bonds:**

- The NAV of the Scheme, to the extent invested in Debt Securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Debt Securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is sold.
- Debt Securities are subject to the risk of the issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated Securities offering higher yields.
- The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) in certain circumstances [outlined in Section III-B 'Restrictions on Redemptions']. There may be temporary periods when the monies of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell Securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for Debt Securities could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of the Securities held in the Scheme's portfolio.
- The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to their target date of divestment.
- Debt Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to Debt Securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted Debt Securities that offer attractive yields within regulatory limits. This may however

increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investment due to its holdings of the unlisted Securities may be affected if they have to be sold prior to the target date of investment.

- While Debt Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market Securities, while fairly liquid, lacks a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the Security is finally sold.
- Money market Securities and debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). These Securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The AMC will endeavour to manage credit risk through in-house credit analysis. The Scheme may also, but is not obliged to, use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio. There is no guarantee that hedging techniques will achieve the desired result.
- The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income Securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income Securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income Securities can be expected to decline.
- To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by interest rate movement (basis risk) - coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units.
- The value of Securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk:
  - (i) due to the time gap in the resetting of the benchmark rates, and
  - (ii) to the extent the benchmark index fails to capture interest rate changes appropriately (spread risk): though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.
- **Settlement Risk (counterparty Risk):** Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;
- **Liquidity Risk:** The market for floating rate Securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such Securities that the Scheme is invested in.
- **Prepayment Risk:** The borrower / issuer of security may prepay the receivables prior to their respective due dates. This may result in change in the yield and tenor for the Scheme.
- Different types of Securities in which the Scheme may invest as given in the SID carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than government Securities. Further even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

#### **d) Risks associated with investment strategy of schemes involving cyclical stocks**

The Scheme will invest in securities with focus on riding economic cycles through dynamic allocation between various sectors and stocks at different stages of economic activity. It is possible that such an economic cycle may get impacted by factors like inflation or monsoon or global factors or macro conditions. Identifying the stage of economic cycle is critical to the relative performance in the equity markets as sector performance across the cycle is not homogeneous with different sectors providing true representation of the economic situation at different points of the cycle. As a result, different sectors assume market leadership across different economic phases. Since, the NAV of the scheme is linked to the share price performance of such companies; they may outperform or underperform the benchmark index and / or the constituents of the said benchmark index.

#### **e) Risk Associated with Short Selling and Securities Lending**

**Risks Associated With Stock Lending:** The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of Opportunity loss.

**Risks associated with short selling:** Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity, price movement & volatility of the security by the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

#### **f) Risks associated with investing in Securities Segment and Tri-party Repo trade settlement**

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

#### **g) Risks associated with transaction in Units through stock exchange(s):**

In respect of transaction in Units of the Scheme through BSE and / or NSE (applicable to the facility to transact in the Units of the Scheme through the Stock Exchange mechanism provided by the AMC), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

#### **h) Risks associated with Restrictions on Redemption:**

As outlined in Section I – ‘Restrictions on Redemptions’ the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

#### **B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemption. It may also have impact on the liquidity of the Scheme, which may lead to an adverse impact on the NAV of the Scheme.
- As the liquidity of the Scheme investments may sometimes be restricted when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or efficient functioning of markets, the time taken by the Fund for Redemption of Units (subject to lock in period, if any) may be significant during such events. Trustee Company, and in accordance with applicable regulations, circulars and other prevalent guidelines, to limit redemptions under certain circumstances. Please refer to the paragraph “Right to Limit Redemption” in the SAI for further details.

- In accordance with the SEBI Regulations, an AMC subject to certain conditions is permitted to undertake activities in the nature of portfolio management services and management and advisory services to pooled assets including offshore funds, insurance funds, pension funds, provident funds, if any of such activities are not in conflict with the activities of the Mutual Fund. ### **Right to Limit Redemptions**

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme when there are circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets such as:

1. Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security.
2. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
3. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.

Such restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period. However, if exceptional circumstances / systemic crisis referred above continues beyond the expected timelines, the restriction may be extended further subject to the prior approval of Board of Directors of the AMC and Trustee Company giving details of circumstances and justification for seeking such extension shall also be informed to SEBI in advance.

### **Procedure to be followed while imposing restriction on redemptions**

- a. No redemption requests upto Rs. 2 lakhs per request shall be subject to such restriction;
- b. Where redemption requests are above Rs. 2 lakhs:
  - i. The AMC shall redeem the first Rs. 2 lakhs of each redemption request, without such restriction;
  - ii. Remaining part over and above Rs. 2 lakhs shall be subject to such restriction and be dealt as under:
    - Any Units which are not redeemed on a particular Business Day will be carried forward for Redemption to the next Business Day, in order of receipt.
    - Redemptions so carried forward will be priced on the basis of the Applicable NAV (subject to the prevailing Load, if any) of the subsequent Business Day(s) on which redemptions are being processed.

Under such circumstances, to the extent multiple redemption requests are received at the same time on a single Business Day, redemptions will be made on a prorata basis based on the size of each redemption request, the balance amount being carried forward for redemption to the next Business Day.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The scheme does not assure or guarantee any returns.

### C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation pattern will be as follows:

Instruments	Indicative allocations (% of net assets)		Risk Profile
	Maximum	Minimum	
Equity and Equity related securities	100%	80%	High
Debt and Money Market Instruments*	20%	0%	Low to Medium

\*Money Market Instruments include CPs, commercial bills, Corporate Debt, T-Bills, and Government securities having an unexpired maturity upto one year, CDs, usance bills, Tri party repos, Repo/ Reverse Repo and any other like instruments having a maturity of 1 year or less, as specified by the RBI from time to time. Short Term Debt instruments include debt instruments with daily to monthly put/call options, debt instruments with maturity less than one year and other like debt instruments.

As per ELSS Guidelines, the funds collected under the Scheme shall be invested in equities, cumulative convertible preference shares and fully convertible debentures and bonds of companies. Further, it shall be ensured that funds of the Scheme remain invested to the extent of at least eighty per cent in securities specified above.

Further, as per the ELSS Guidelines, Mutual Fund may hold upto twenty per cent of net assets of the plan in short-term money market instruments and other liquid instruments to enable it to redeem investment.

Presently investment in Foreign Securities is not permitted as per ELSS Guidelines. The Scheme will not invest in Foreign Securities and ADRs/GDRs issued by Indian or foreign companies.

### Change in Asset Allocation:

While it is the intention of the Scheme to maintain the maximum/minimum exposure provided in the table above, there may be instances when these percentages may be exceeded on short term defensive considerations. Typically, this may occur while the corpus is small thereby causing diversification issues or there exist no suitable equity and equity related opportunities or due to unusual / unforeseen conditions, such rebalancing is not in the interest of unitholders. Unusual conditions include, but are not limited to, extreme volatility of the stock market, fixed income and money markets, natural calamities, communication breakdowns, internal system breakdowns, strikes, bandhs, riots or other situations.

Further, subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above they can vary substantially depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and defensive considerations.

### Debt and Money Markets in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. Securities in the debt market typically vary based on their tenure and rating. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities market is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Sec market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc. The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non- Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), reverse repo transactions (temporary buy with an agreement to sell the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI) and similar securities. In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and non government debt vary from time to time.

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. PSU / DFI / Corporate paper with a residual maturity of less than 1 year are actively traded and offer a viable investment option.

Following table exhibits various debt instruments along with current yields as on May 31, 2020.

Instrument	Yield Range
	(% per annum)
Tri – Party Repo	3.11
Repo	3.08
91 days T-Bill	3.30

(Source: Bloomberg, NDS OM and CCIL)

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

### Risk Control:

Investments in equity, debt and derivative securities carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. For risk control, the following may be noted:

Risk & Description specific to the Scheme	Risk mitigants / management strategy
